Product Specifications

Product Name: Be used wood plastic of PVC pro-environment stabilizers

Product Aspect: white or yellowish powder

Product Model: RT-800E

Product Features:

- 1、The product has **excellent initial coloring and long-term thermal stability**.
- 2、The pro-environment stabilizers have **excellent weather resistance**.
- 3、The pro-environment stabilizers own high efficiency and **cost effective**.
- 4、The pro-environment stabilizers own a good processing performance, that can improve production efficiency.
- 5、The pro-environment stabilizers can effectively enhance the performance of crack toughening for wood plastic products, and make the products have good dimensional stability. They Can effectively promote the **foaming, the foam is uniform and fine. While giving the product surface clear texture and excellent gloss**.

Product Usage:

According to the product specifications and machine condition should be appropriately regulated lubricant.

Dosage: The pro-environment stabilizers use volume from 4.0 to 5.0 per 100 PVC

Standard:

According to the third party international specification, the product conforms EN71-3, RoHS, PAHs(18 items), Phthalates(21 kinds), PFOS/PFOA, NP, BPA, REACH-SVHC.

Product Storing:

Advice to put the product in dry and draft chamber. Please using up once package opened

Product Packaging: 25Kg/Package
